Instructions and Checklist for Water Permit Applications

IN ORDER TO REVIEW A PERMIT APPLICATION FOR INSTALLING NEW WATER SERVICE OR MAKING CHANGES TO EXISTING WATER SERVICE, THE CITY OF KENT REQUIRES THE FOLLOWING INFORMATION:

- Completed Application Form (required for all applications)**
- Site Plan (may be required depending on the scope of work)**

Residential:

A site plan is not required for single family residences in a plat/short plat with an existing meter box installed as part of the plat construction.

A site plan prepared per the City of Kent Design and Construction standards (KDCS) is required for a single family house constructed on an individual lot that does not have an existing meter box to serve the lot. The applicant must stake or mark the location of the proposed meter box for pre-approval by the Utility Billing Field Services Department (253-856-5200) prior to tapping the main and setting the meter box.

A site plan is required for single family residences installing a backflow preventor for irrigation system showing the location of the backflow preventor.

Commercial:

A site plan prepared per KDCS is required for new commercial development. A copy of the approved engineering plans for the commercial development will be acceptable for the site plan.

A site plan prepared per KDCS is required for commercial developments installing a deduct meter and/or backflow preventor for irrigation systems behind an existing domestic meter.

A site plan may not be required for retail or commercial installations of a backflow prevention device for a soda pop machine or other installations of backflow prevention devices inside the building. A detailed description of the equipment, fixtures and areas to be isolated by the backflow device may be provided instead of a site plan. A site plan may be required if it will clarify the installation and location of the backflow devices.

Separate Street Use Permit Required

See instructions and checklist for Street Use Permit Application if the work will extend into the City's Right-of-Way. Traffic Control Plans will be required showing how traffic will move safely through the construction area.

Water Availability Certificate Instructions

- Completed Water Permit Application Form
- Applicant to complete top portion of the Certificate of Water Availability Form
- Site plan or map showing property
- If property to be served with City water is outside the City of Kent city limits, a "No Protest of Annexation and Declaration of Covenant" agreement may be required to be signed by the property owner and notarized.
